- . OPTICALLY CORRECT, COMPOUND CURVED SCRATCH RESISTANT UV TREATED FACE SHIELD FEATURING THE LATEST INTEGRATED INTERNAL RATCHET SYSTEM
- . SQUARE TYPE D-RING WITH CHIN STRAP HOLDER

## AVAILABLE SIZES

YOUTH SMALL, YOUTH MEDIUM, YOUTH LARGE

SILVER

## AFX FX-12 CAF® VENTILATION SYSTEM

CAF® CONTROLLED AIR FLOW VENTILATION SYSTEM EXPLAINED

### CHIN VENT

The shape and size of the FX-12 chin vent is designed for optimal airflow and reduced noise. Its compound curved design was developed to allow airflow to smoothly pass over the chin area of the helmet. In the open position air is redirected up the inside of the face shield rather than through the front jaw. This greatly reduces the chance of fogging and promotes an even airflow across the inside surface of the face shield. This feature is similar to the windshield vent found in most modern automobiles.

### TOP VENT

Like the chin vent, the top forehead vent is aerodynamically designed to optimize airflow.

In the open position air is forced into large intake holes in the outside vent cover, and channeled to the forehead area. Once inside the helmet, air is directed along paths designed into the fully removable liner system. These air paths lead the air around both sides of the top of the head.

### SIDE AIR EXIT VENTS

The most noticeable feature of the new CAF® system is the side air exit vents. These vents are designed to allow air inside the chin area to be drawn out through the side of the helmet. Air passing over these vents creates a vacuum inside the vent area.

In the open position air inside the chin area is drawn out through passages in the front chin bar to the side of the helmet, where fast moving air over the vents pulls the air out through the back of the vent. The function of this vent is controlled by small switches on the outside of the helmet incorporated into the vent design. This provides the convenience of being able to open or close the vents with out having to remove the helmet.

## AFX X-15R CAF® VENTILATION SYSTEM

### CAF® CONTROLLED AIR FLOW VENTILATION SYSTEM EXPLAINED

#### CHIN VENT

The shape and size of the X-15R chin vent is designed for optimal airflow and reduced noise. Its compound curved design was developed to allow airflow to smoothly pass over the chin area of the helmet. In the open position air is redirected up the inside of the face shield rather than through the front jaw. This greatly reduces the chance of fogging and promotes an even airflow across the inside surface of the face shield. This feature is similar to the windshield vent found in most modern automobiles.

#### TOP VENT

Like the chin vent, the top forehead vent is aerodynamically designed to optimize airflow.

In the open position air is forced into large intake holes in the outside vent

cover, and channeled to the forehead area. Once inside the helmet, air is directed along paths designed into the fully removable liner system. These air paths lead the air around both sides of the top of the head.

#### SIDE AIR EXIT VENTS

The most noticeable feature of the new CAF® system is the side air exit vents. These vents are designed to allow air inside the chin area to be drawn out through the side of the helmet. Air passing over these vents creates a vacuum inside the vent area.

In the open position air inside the chin area is drawn out through passages in the front chin bar to the side of the helmet, where fast moving air over the vents pulls the air out through the back of the vent. The function of this vent is controlled by small switches on the outside of the helmet incorporated into the vent design. This provides the convenience of being able to open or close the vents without having to remove the helmet.

## REMOVABLE LINER SYSTEM

Designed around the new ventilation system, our second-generation removable liner provides the ability for total comfort and airflow control with the convenience of easy removal for cleaning or replacement. Separate cheek pads and comfort liner, enable the rider to custom tailor the fit of the helmet to their individual needs. New hypoallergenic super soft material is designed to be comfortable and durable with the added feature of being easy to clean.

- YOUTH MEDIUM = ADULT XXS
- YOUTH LARGE = ADULT XS

RED MULTI

### The Helmet That Can Grow With Your Child

By simply replacing the cheek pads and liner a FX-6R helmet can be transformed to comfortably fit a child with any of three youth helmet sizes: Youth Small, Youth Medium or Youth Large. For example, you could take an existing Youth Small FX-6R helmet, pop out the cheek pads and removable liner, replace them with the Youth Large cheek pads and liner, and end up with a Youth Large FX-6R helmet. Since the physical shell of the FX-6R helmet never changes, the impact safety provided by DOT-approved youth helmet is not affected by the change.

We at AFX feel that for a helmet to protect properly, it must fit correctly. That is why we have gone to great lengths to create some of the best fitting helmets available on the market. To find the right helmet for you, have your head circumference measured one-inch above the eyebrows and ears, then use this chart to find the corresponding AFX helmet size.

### ADULT SIZE HELMET FIT CHART

X-SMALL	SMALL	MEDIUM	LARGE	X-LARGE	XX-LARGE
54-55 CM. 6 <sup>3</sup> / <sub>4</sub> - 6 <sup>7</sup> / <sub>8</sub> HAT 21 <sup>1</sup> / <sub>4</sub> - 21 <sup>5</sup> / <sub>8</sub> IN.	56-57 CM. 7 - 7 <sup>1</sup> / <sub>8</sub> HAT 22 - 22 <sup>7</sup> / <sub>16</sub> IN.	58-59 CM. 7 <sup>1</sup> / <sub>4</sub> - 7 <sup>3</sup> / <sub>8</sub> HAT 22 <sup>13</sup> / <sub>16</sub> - 23 <sup>1</sup> / <sub>4</sub> IN.	60-61 CM. 7 <sup>1</sup> / <sub>2</sub> - 7 <sup>5</sup> / <sub>8</sub> HAT 23 <sup>5</sup> / <sub>8</sub> - 24 IN.	62-63 CM. 7 <sup>3</sup> / <sub>4</sub> - 7 <sup>7</sup> / <sub>8</sub> HAT 24 <sup>3</sup> / <sub>8</sub> - 24 <sup>13</sup> / <sub>16</sub> IN.	64-65 CM. 8 - 8 <sup>1</sup> / <sub>8</sub> HAT 25 <sup>3</sup> / <sub>16</sub> - 25 <sup>5</sup> / <sub>8</sub> IN.
