HELMET FIT CHART

We at AFX feel that for a helmet to protect properly, it must fit correctly. That is why we have gone to great lengths to create some of the best fitting helmets available on the market. To find the right helmet for you, have your head circumference measured one-inch above the eyebrows and ears, then use this chart to find the corresponding AFX helmet size.

The story of AFX

When we started AFX our main goal was to put a little common sense back in to the helmet market. We saw an opening for a good quality helmet line that could be sold at a reasonable price with full features, and exception quality.

We so embodied these goals that we made them the name of our company.

A = AFFORDABILITY
 F = FUNCTION ABILITY
 X = EXCEPTIONAL QUALITY

Since our humble beginning in the basement of our house we have grown to become one of the more prominent helmet companies in America. But all the while we never forgot where we came from and where we want to go. We will continue to produce the best possible helmets at the most reasonable prices to the highest quality standards.

For 2005 we are adding 13 all new helmet models for a total of 22 distinct models. This represents the single largest growth in the history of our company. None of this would have been possible without the continued support of our distributors, dealers, and consumers that have made AFX their helmet of choice.

While we look to the future, we will never forget the past. Our main goal will to always build good quality helmets that could be sold at a reasonable price with full features, and exception quality.

What makes up an AFX helmet

We make all our helmets out of the same material. We only use the best grade of poly alloy. This material is a polycarbonate mix with special cold weather additives and paint curing additives. All our helmets are high-pressure injection molded with the mold part line removed and painted over. To ensure a long lasting finish we use multiple layers of paint with a super hard UV treated clear coat finish. Our paint actually bonds to the helmet shell to provide a durable long lasting finish.

All of our face shields are compound curved hard-coated scratch resistant with a special UV treatment to ensure years of use.

Inside every AFX helmet we use plush brushed hypoallergenic liners that are not only very comfortable but also durable. Every helmet chinstrap is attached with hi strength stainless steel rivets.

Helmets designed with our removable liner system use only stainless steel and plastic snaps for durability and ease of cleaning.

All of our helmets with graphics are given a special UV treated clear coat to protect the graphic from peeling off or fading.

No matter what AFX helmet you buy from our FX-68 dot approved beanie helmet to our new Snell m2000 approved FX-96 Street helmet the same consistency and quality of materials is used in every AFX helmet model.

All AFX helmets feature a lifetime limited warranty against any defect in workmanship or function.
