## FX-11 LIGHTFORCE

AFX LightForce helmets are the world's first, and only, motorcycle, off-road, and snowmobile helmets with a fully-integrated and rechargeable power system. In the FX-11, this system powers miniature fans located in the helmet's chinbar that help keep your faceshield fog-free while continually circulating cool, fresh air around the helmet's interior. The FX-11 also features an ultra bright LED light which can be used for convenient night-time utility or in situations where high visibility is desirable.

- Lightweight rechargeable 7.4 VDC 600mAh Lithium Ion power system with included wall charger.
- System lasts over 20 hours with normal usage with a full charge
- Ultra bright 6000mcd LED that can be seen for almost a mile and lasts over 10,000 hours
- Two miniature high capacity fans that circulate air inside the helmet. One fan draws in fresh air from the chin vent. And one fan extracts air through the side vents.
- Highly durable and waterproof switches
- System requires a charge time of 1 hour maximum.

# HELMET FITTING CHART

We at **AFX** believe that for a helmet to protect a rider properly, it must fit correctly, and as a result, we have gone to great lengths to create some of the best-fitting helmets available on the market. To find the right helmet for you, have your head circumference measured one-inch above the eyebrows and ears, then use this chart to find the corresponding **AFX** helmet size. Please note that hat sizes are for reference only, and should not be used exclusively when deciding on a helmet size. For a more detailed guide to helmet fitting, please visit the resources section on our website ([www.afxhelmets.com](http://www.afxhelmets.com)).
