FX-90E

HELMET TECHNOLOGY

- 1 SHELL DESIGN**
 An aerodynamic shell design constructed using an advanced lightweight composite poly-alloy
- 2 FACE SHIELD**
 A flush-fit, side-coverless face shield that is optically correct, compound-curved, scratch-resistant and protects against UV-rays
- 3 QUICK RELEASE RATCHET**
 Quick release shield ratchet system
- 4 VENTILATION**
 7 points of ventilation with chin, side, forehead, top and rear vent. 5 intake vents and 2 exhaust vents

ECE 22.05

MAIN SPECIFICATIONS

- This helmet model meets or exceeds ECE 22.05 motorcycle helmet safety standards
- Retention system is a race approved Double D-RING
- Provides ample ear cavity space for most speaker systems
- There are 2 tinted shields available for this model
- A clear coat finish to protect paint & graphics
- A large-size FX-90E weighs 1.30 kg or 2.86 lbs.
- Available size: XS-XXL

NOTE: SEE PAGE 7 FOR THE COLD WEATHER SHIELDS, BREATH GUARDS AND CHIN CURTAINS

REMOVABLE, WASHABLE AND CUSTOM SIZABLE INTERIOR

AFX helmet liners and cheek pads are made with a hypoallergenic and anti-microbial nylon, most of which are removable and washable.

The size of this helmet is based on a combination of four factors: outer shell size, inner EPS thickness, comfort liner thickness and cheek pad thickness. The fit of the helmet can be customized by replacing your existing cheek pads with thinner cheek pads (for a looser fit) or thicker cheek pads (for a tighter fit). The fit can also be customized by replacing your existing comfort liner with a thinner comfort liner (for a looser fit) or thicker comfort liner (for a tighter fit).

Please refer to the shell, liner and cheek pad compatibility chart below. Keep in mind these components can only be replaced inside the group of sizes contained in each size range block.

- There are 4 tinted shields available for this model
- A clear coat finish to protect paint & graphics
- A large-size FX-41DS weighs 1.68 kg or 3.69 lbs.
- Available size: XS-XXL

NOTE: SEE PAGE 121 FOR THE COLD WEATHER SNOW BREATH GUARD & CHIN CURTAIN

REMOVABLE, WASHABLE AND CUSTOM SIZABLE INTERIOR

AFX helmet liners and cheek pads are made with a hypoallergenic and anti-microbial nylon, most of which are removable and washable.

The size of this helmet is based on a combination of four factors: outer shell size, inner EPS thickness, comfort liner thickness and cheek pad thickness. The fit of the helmet can be customized by replacing your existing cheek pads with thinner cheek pads (for a looser fit) or thicker cheek pads (for a tighter fit). The fit can also be customized by replacing your existing comfort liner with a thinner comfort liner (for a looser fit) or thicker comfort liner (for a tighter fit).

Please refer to the shell, liner and cheek pad compatibility chart below. Keep in mind these components can only be replaced inside the group of sizes contained in each size range block.

HELMET TECHNOLOGY

- 1 SHELL DESIGN**
 An aerodynamic shell design constructed using an advanced lightweight composite poly-alloy
- 2 VENTILATION**
 11 points of ventilation with chin, side, forehead, top and rear vent. 3 intake vents and 8 exhaust vents
- 3 CONE-HEAD EPS**
 Advanced in-molded® cone-head® ultra light weight EPS protection system. In-mold construction fuses the helmet's outer shell with the impact-absorbing EPS liner. The two materials are fused together, and one is reinforced by the other. This 'exoskeleton' allows helmets to be engineered that are lighter, more durable and better ventilated
- 4 VISOR**
 A removable and adjustable (40mm) screw-on visor

MAIN SPECIFICATIONS

- This helmet model meets or exceeds both ECE 22.05 and DOT FMVSS-218 motorcycle helmet safety standards
- Retention system is a race approved Double D-RING
- Provides ample ear cavity space for most speaker systems
- A clear coat finish to protect paint & graphics
- A large-size FX-21 weighs 1.34 kg or 2.96 lbs.
- Available size: XS-XXL

NOTE: SEE PAGE 121 FOR THE COLD WEATHER SNOW BREATH GUARD & CHIN CURTAIN

REMOVABLE, WASHABLE AND CUSTOM SIZABLE INTERIOR

AFX helmet liners and cheek pads are made with a hypoallergenic and anti-microbial nylon, most of which are removable and washable.

The size of this helmet is based on a combination of four factors: outer shell size, inner EPS thickness, comfort liner thickness, and cheek pad thickness. The fit of the helmet can be customized by replacing your existing cheek pads with thinner cheek pads (for a looser fit) or thicker cheek pads (for a tighter fit). The fit can also be customized by replacing your existing comfort liner with a thinner comfort liner (for a looser fit) or thicker comfort liner (for a tighter fit).

Please refer to the shell, liner and cheek pad compatibility chart below. Keep in mind these components can only be replaced inside the group of sizes contained in each size range block.

HELMET TECHNOLOGY

- 1 SHELL DESIGN**
A sleek European influenced shell design constructed using an advanced lightweight composite poly-alloy
- 2 FACE SHIELD**
A flush-fit, built in side-cover style face shield that is optically correct, compound-curved, scratch-resistant and protects against UV-rays
- 3 VENTILATION**
4 points of aerodynamically designed flush fit ventilation with chin, top, rear, and unique side extraction vents. 1 intake vents and 3 exhaust vents
- 4 INNER SUN SHIELD**
Smoke tinted inner flip down sun shield system with center slide lever
- 5 4 IN 1 A**
Helmet can be configured one of four different ways.
Ships with all parts included

A 4 IN 1

Includes visor colored side-covers for shield use without the visor

1. Helmet with visor and shield (standard configuration)

2. Helmet with visor

INCLUDES VISOR COLORED SIDE-COVERS AND SCREW PLUG FOR SHIELD USE WITHOUT THE VISOR

3. Helmet with shield

4. Helmet only

MAIN SPECIFICATIONS

- This helmet model meets or exceeds both ECE 22.05 and DOT FMVSS-218 motorcycle helmet safety standards
- Retention system is Microlock (quick release)
- A clear coat finish to protect paint & graphics
- A large-size FX-50 weighs 1.30 kg or 2.80 lbs.
- Available size: XS-XXL

REMOVABLE, WASHABLE AND CUSTOM SIZABLE INTERIOR

AFX helmet liners and cheek pads are made with a hypoallergenic and anti-microbial nylon, most of which are removable and washable.

The size of this helmet is based on a combination of four factors: outer shell size, inner EPS thickness, comfort liner thickness and cheek pad thickness. The fit of the helmet can be customized by replacing your existing cheek pads with thinner cheek pads (for a looser fit) or thicker cheek pads (for a tighter fit). The fit can also be customized by replacing your existing comfort liner with a thinner comfort liner (for a looser fit) or thicker comfort liner (for a tighter fit).

Please refer to the shell, liner and cheek pad compatibility chart below. Keep in mind these components can only be replaced inside the group of sizes contained in each size range block.

Face Shield Is A Dual Lens Thermal Pane Design, For Use In Cold Weather Conditions

This Full Face Helmet Features A Drop Down Inner Sun Shield

Face Shield Is A Electrically Heated Dual Lens Thermal Pane Design, For Use In Extreme Cold And Freezing Weather Conditions

AFX HELMET FIT AND SIZE GUIDE

HOW TO FIND THE RIGHT FITTING HELMET FOR YOUR HEAD SHAPE

To properly choose a helmet fit, there are three important points of criteria that need to be examined in order for you to choose the helmet that fits you best.

1. Head Shape

The shape of the riders head is more important than the measured size of the riders head. Head shape can be determined by many factors including genetics and ethnic origin. However its important to note that there is no universal perfect head shape that is used for all models of helmets. Some helmets are designed for a functionality that dictates the final shape and fit of the helmet in question.

AFX helmets can be grouped into these three main fit categories: slightly narrow fit, neutral fit, and slightly round fit.

- Slightly Narrow Fit, helmets in this head shape may feel a little tighter on the left and right sides of the riders head.
- Neutral Fit, helmets in this head shape tend to fit a majority of riders.
- Slightly Round Fit, helmets in this head shape may feel a little tighter on the front and back sides of the head for some riders.

Please refer to the AFX helmet fit shape explanation

2. Size Measurement

Determine the circumference of the widest part of your head by using a flexible tape measure. Generally, the widest part of a person's head is the area 2.5 cm (1") above the eyes and ears. However, we suggest measuring at a few points both above and below that line to determine the greatest measurement before referring to our size table. We also suggest testing the fit of a helmet one size smaller and one size larger than what the chart recommends. No helmet can provide protection if it's too uncomfortable to wear.

Please refer to the AFX helmet sizing chart

3. Comfort and Fit

Helmets must fit snugly, but not painfully tight. While holding the chinstraps outside of the helmet, pull it down over your head, taking care that the chinstraps do not go up inside the helmet. A proper-fitting helmet will feel snug with fairly even pressure around the sides and top of your head. On most modern helmets the liner and cheek pads are designed to be a little extra snug at first, but will break-in after several hours of riding to match the particular shape of your head. If you are not familiar with how a helmet should fit and feel, be sure to ask for assistance from a more experienced rider. As a rule, the helmet should not be able to move around on your head without pulling on your skin. A loose fitting helmet is not only dangerous, but may also be noisy and tiring to wear. Most people make the mistake of buying a helmet that's too large. **IMPORTANT:** Make sure that you fasten the chinstrap securely beneath your chin when trying-on a helmet and then test to see that the helmet cannot be removed from your head when fastened in that manner.

Note: Most AFX helmets offer some degree of comfort and fit customization by being able to interchange combinations of comfort liners and cheek pads within the helmet shell size range. For a more detailed explanation of this feature please refer to the owners manual included with your helmet or visit afxhelmets.com.

57	22 3/8	7 1/8	Adult Medium	M
58	22 3/4	7 1/4	Adult Medium	M
59	23 1/8	7 3/8	Adult Large	L
60	23 1/2	7 1/2	Adult Large	L
61	24	7 5/8	Adult X-Large	XL
62	24 3/8	7 3/4	Adult X-Large	XL
63	24 3/4	7 7/8	Adult XX-Large	XXL
64	25 1/8	8	Adult XX-Large	XXL

Note: * Due to size fit similarities between Youth large and Adult X-Small Helmets in the sizes noted above, It is the Parents /Guardians responsibility to determine if a Youth Rider may safely and comfortably wear an Adult sized helmet.

SAFETY

WHEN TO REPLACE A HELMET

The expected lifespan of any helmet is 4-5 years of seasonal use, and decreases accordingly as the frequency of use increases. As you would expect, helmets used for competition such as road racing and motocross tend to have a much shorter life span. The more exposure a helmet endures to the elements, body oils, and perspiration, the faster it will wear out. In most cases the helmet liner will be the first component to wear out and, as such, functions as a good indicator that a helmet should be replaced.

We at AFX recommend that any helmet suffering a significant impact to the shell be removed from use immediately, whether there is visible physical damage or not. A helmet is designed to deform in an accident in order to absorb the energy of the impact, and should never be reused afterwards for its ability to protect the rider further could be compromised.

SAFETY REMINDER

No helmet can protect the wearer against all possible or foreseeable impacts. A helmet can only protect the portion of the head that is covered by the helmet. For maximum protection, the helmet must be well fitted with the chinstrap securely fastened. Failure to follow these instructions, the instructions printed on the helmet, and those contained in the owner's manual may result in the possibility of the helmet coming off during an accident - possibly resulting in a severe head injury or even death. While riding motorcycles, scooters, ATVs and snowmobiles is fun, it can also be a dangerous pastime. At AFX, we encourage you to enjoy riding responsibly, and to always ride within the limits of your abilities.
